

SUROJU JYOTHI KRISHNA KANTH

Tadepalle,Guntur,Andhra Pradesh

+91 6304507289 ◊ sjkrishnakanth@gmail.com◊ linkedin.com/in/surojujyothikrishnakanth

EDUCATION

Bachelor of Technology in ELECTRONICS AND COMMUNICATION ENGINEERING

June 2023 - May 2027

KL University, CGPA: 9.12/10.00

BOARD OF INTERMEDIATE ANDHRA PRADESH

2021 -2023

SRI CHAITANYA JUNIOR COLLEGE ,VIJAYAWADA, ANDHRA PRADESH, 818/1000%

CBSE BOARD Class X

March 2020

ATKINSON HIGH SCHOOL,VIJAYAWADA, 68%

PROFILE

Interests	Product Development, Design, Automobiles,Research and Development, Modeling and Simulation
Design Software	Technologies Basic AUTOCAD, ARDUINO ,KEIL SOFTWARE,STM ELECTRONICS, TEXAS INSTRUMENTS , MATLAB,
Programming Languages	C,JAVA(Basic oops concepts),Python(Basics),Data Structures,Embedded C++(Basics)

SKILLS

Core Skills	Dedicated Learner,Time Management, Adaptability
Communication	Public Speaking, Presentation Skills
Leadership	Team Leadership – Ability to lead teams, motivate members, and achieve goals collaboratively

PROJECTS

TRACER-NODEMCU ESP8266

- A Project involving the NODEMCU ESP8266 integrated with GSM and GPS modules that tracks the location of mobile and traces or updates the last location of person by sending his location to his GMAIL OR WHATSAPP
- Helps for the patients of dementia to track in the territories by tracing their location

ADAPTIVE HEADLIGHT ADJUSTMENT SYSTEM -AHAS

- An AUTOMOTIVE project involves the ESP32 board integrated with LDR Light Dependent Resistor that adjusts the light beam of headlight based on the beam of other vehicle and conditions
- A safety enhanced simple project that shifts the light beams based on threshold conditions for drivers safety at nights.

AGRO-WEB AN EMBEDDED WEB SERVER FOR AGRICULTURE MONITORING

- Developed a web server using BLYNK AND THINGSPEAK IOT INTERFACES integrated with STM32 and sensors like DHT11 ,TEMPERATURE,HUMIDITY,SOIL MOISTURE SENSORS ALONG SPRINKLERS AND MOTOR ACTUATORS reacts to the thresholds and conditions and works accordingly by the complete web data available on data for analysis

BUS SAFETY SYSTEMS

- In order to reduce the increasing BUS accidents on ROAD to enhance and ensure passenger safety a system integrated with STM32 along with fire sensors and gas sensors that senses the emergency situation and alarms the buzzer and automatically sprinkles the water or CO2 gas without manual intervention could atleast calm down the flames inside and chaos.
- Aiming for passenger safety.

RESEARCH PUBLICATION

S Krishna Kanth, Susanth , Bhargav” *Alarm Fatigue System*

An Smart Healthcare application designed to calculate the vitals of patient remotely and for the hospital management for the doctors to diagnose the reports easire and continous tarck of patient health integrated with spo2,heart rate ,temparature sensors along with the Random Forest AI model”

May 2016

INTERNSHIP/TRAININGS

Efftronics Systems pvt ltd,

June 2025

Worked as an intern in efftronics systems and part of the projects RFID HZ-100 nad Zigbee device communication testings

MicroChip technologies,Taras Solutions,

APRIL 2025

Completed my 2 levels of Training certificates from Microchip Taras solutions under Embedded Systems and Artificial intelligence and machine learning

Cadence Spectre Certificate,

June 2025

EXTRA-CIRRICULAR

- PRESIDENT-ARTCLUB KL UNIVERSITY (STUDENT ACTIVITY CENTER)
- CORE COMMITTEE LEAD IEEE SENSORS COUNCIL SOCIETY KL UNIVERSITY

DECLARATION

I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
